Hi

Seeking approval to send a second warning to user science.war.trains.etc.

Thank you

Subject: User moderation of Trove user:science.war.trains.etc second warning

Good afternoon [staff name redacted],

This morning we received an additional report from Trove user "yelnod" ([name redacted]) relating to actions from science.war.trains.etc against his account after the first warning was issued yesterday.

In addition to these changes Mr [name redacted] identified several offensive 'corrections' made by anonymous users to articles previously corrected by Mr [name redacted] as documented in R18/76667. These were posted after the first warning to science.war.trains.etc was issued. A tame example is "yelnod the yelnod is a sub-human cretin, looks like a". The comments have since been deleted. On investigation, IT identified these comments as having been made from the same IP address as used by user science.war.trains.etc, it is likely that this is the same user.

Please advise what action to take. Should we implement the second warning for Trove user account "science.war.trains.etc".
